PROFILE SUMMARY

Software Engineer with 5+ years of experience in Cloud Engineering. Skilled in AWS, GCP, Go, Python, AWS, Kubernetes, OpenShift, and Terraform, with expertise in microservices, CI/CD, cloud-native applications, and GenAI/RAG solutions. Proven track record of delivering scalable, high-performance solutions across BFSI, EdTech, Aerospace and industrial automation domains.

PROFESSIONAL EXPERIENCE

Infosys Limited | Associate Consultant

Nov 2024 – Present

- Collaborated with cross-functional teams to streamline development, deployment, and monitoring processes.
- Built custom AWS AMIs and embed them with Launch Templates and Autoscaling Groups for automated, scalable EC2 provisioning.
- Managed and deployed containerized applications using Docker, Kubernetes, and AWS EKS with Istio for traffic management.
- Designed and enforced secure IAM policies following least-privilege access principles for AWS resources.
- Built and deployed microfrontends using S3, CloudFront, Route 53, and WAF, ACM, enabling secure and independent releases.
- Managed declarative Kubernetes deployments through Helm and Argo CD, improving deployment reliability and rollback capabilities.
- Developed and deployed RAG-based AI chatbots using LangChain and LLM for retrieval of aircraft maintenance documentation.
- Reduced AWS operational costs by automating the detection and removal of unused cloud resources using Go and AWS SDK.
- Design CI/CD pipeline with ansible to automate build, package and deployment of application binaries across 200+ Linux servers
- Automated data ingestion, embedding generation using Python, LangChain, OpenAI APIs, and vector search for RAG System.

Tata Consultancy Services Limited | Systems Engineer

June 2022 – Nov 2024

- Mentored junior engineers and conducted code reviews to improve code quality, maintainability, and overall application performance.
- Replaced legacy REST-based APIs with high-performance gRPC services, reducing inter-service communication latency by 40%.
- Leveraged OpenTelemetry with Prometheus, Grafana, and AWS X-Ray to improve system visibility and incident resolution.
- Managed and integrated a wide range of GCP services to implement reliable, secure, and scalable DevOps best practices.
- Configured scheduled background processing workflows using Linux crontab for Go-based services and log processing tasks.
- Integrated Helm charts with CI/CD pipelines for automated application packaging, versioning, and release management.
- Performed troubleshooting and RCA for pod-level and microservice production issues in OpenShift banking applications.
- Configured and maintained Akamai CDN for OpenShift-hosted applications, optimizing content delivery, performance, and security.
- Implemented CI/CD-driven deployment on GCP App Engine to deliver highly available, scalable, reliable cloud-native applications.
- Developed and deployed serverless applications using Google Cloud Functions for event-driven and scalable backend processing.

DBDS Robotics Private Limited | Project Engineer

October 2019 – April 2022

- Delivered, maintained, and troubleshoot end-to-end frontend, backend, cloud, and IEC 61131-3 solutions across the SDLC.
- Engineered Go-based AWS automation tools to streamline EC2, S3, and infrastructure management tasks.
- Contributed to MVP releases by resolving critical production issues and delivering timely hotfixes for stable deployments.
- Embedded Prometheus metrics into microservices for real-time performance monitoring and alerting.
- Integrated IIoT, HMI, and robotic systems to enhance industrial automation, increasing efficiency by 35% and reduced costs by 20%.
- Enhanced development and deployment workflows using Jenkins, SonarQube, Docker, Git, Github, and CI/CD automation practices.
- Migrated legacy Node.js and Java backend services to Go-based AWS Lambda functions, reducing cold-start times by 95%.
- Worked closely with field engineers to troubleshoot IIoT gateway connectivity and virtual-to-physical device communication issues.
- Managed containerized applications using Docker and Kubernetes, including Dockerfile creation and deployment configurations.

SKILLS

- Go • Python • TypeScript • JavaScript • IEC 61131-3 • Angular • Spring Boot • RESTful APIs • gRPC • GraphQL • Terraform • Loki
- Terragrunt • AWS • GCP • OpenShift • Kubernetes • Cloud Run • EKS • EC2 • S3 • Lambda • SNS • SQS • Trivy • ECS • Snyk
- Ansible • Jenkins • GitHub Actions • Docker • Linux • Nginx • Apache • RAG • Pinecone • Agile/Scrum • Pub/Sub • Prometheus
- WAF • OpenTelemetry • Infrastructure as Code (IaC) • CI/CD • Grafana • CloudWatch • ELK Stack • SonarQube • VPC • Subnet
- Security Groups • Firewalls • MQTT • GenAI • OpenAI APIs • Hugging Face • Nagios • Vector Embeddings • GitHub • OpenTofu
- IIoT Gateways • Gitlab • Bitbucket • Microservices • Cloud-Native Development • Containerization • PAC Compliances • Autoscaling

EDUCATION

BE in Electronics and Telecommunication Engineering with 66% | SPPU

April 2021

DE in Electronics and Telecommunication Engineering with 68% | MSBTE

June 2015

Secondary School Certificate Examination with 70% | SSC

March 2011

CERTIFICATIONS

- Certified Google Cloud Platform: Associate Cloud Engineer.
- Azure DevOps Cloud Training.
- Certified Industrial Automation Engineer.
